TARIFF FORMAT

- A. Page Numbering** - Page numbers appear in the upper right corner of the page. Pages are numbered sequentially. However, new pages are occasionally added to the tariff. When a new sheet is added between pages already in effect, a decimal is added. For example, a new page added between pages 14 and 15 would be 14.1.
- B. Page Revision Numbers** - Revision numbers also appear in the upper right corner of each page. These numbers are used to determine the most current page version on file with the Commission. For example, the 4th revised page 14 cancels the 3rd revised page 14.
- C. Paragraph Numbering Sequence** - There are nine levels of paragraph coding. Each level of coding is subservient to its next higher level:

2  
2.1  
2.1.1  
2.1.1.A  
2.1.1.A.1  
2.1.1.A.1.(a)  
2.1.1.A.1.(a).I  
2.1.1.A.1.(a).I.(i)  
2.1.1.A.1.(a).I.(i).(1)

- D. Check Sheets** - When a tariff filing is made with the Commission, an updated Check Sheet accompanies the tariff filing. The Check Sheet lists the pages contained in the tariff, with a cross reference to the current revision number. When new pages are added, the check sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (\*). There will be no other symbols used on this page if these are the only changes made to it (i.e., the format, etc. remain the same, just revised revision levels on some pages.) The tariff user should refer to the latest Check Sheet to find out if a particular page is the most current on file with the Commission.

- 3.1.4 Excel's services are offered to Customers twenty-four hours a day.

SECTION III - DESCRIPTION OF SERVICES, (CONTINUED)

**3.2 Calculation of Distance**

**3.2.1** Usage charges for all mileage sensitive products are based on the airline distance between rate centers associated with the originating and terminating points of the call.

**3.2.2** The airline mileage between rate centers is determined by applying the formula below to the vertical and horizontal coordinates associated with the rate centers involved.

**3.2.2.A FORMULA:** 
$$\sqrt{\frac{(V1- V2)^2 + (H1- H2)^2}{10}}$$

**3.3 Minimum Call Completion Rate**

Customers can expect a call completion rate of 98% during peak use periods for all Feature Group D Equal Access 1+ Services and 0+ Services. The call completion rate is calculated as the number of calls completed (including calls completed to a busy line or to a line which remains unanswered by the called party) divided by the number of calls attempted.

**3.4 Rate Period Overlap**

**3.4.A** For messages which overlap one or more rate periods, the rate in effect at the time of call origination in the originating area applies to the entire duration of that call.

**3.4.B** Subject to the billing increments set forth in this tariff, plus any additional charges which may apply, long distance usage charges are based on the actual usage of Excel's service. Usage begins when the called party picks up the receiver. When the called party picks up timing is determined by hardware answer supervision. Chargeable time ends when either party "hangs up" thereby releasing the connection. Excel does not bill for uncompleted calls.

**3.5 Service Area**

The service area of Excel includes all Equal Access points in South Carolina.

**3.6 Promotional Offering**

The Company may, from time to time, make promotional offering to enhance the marketing of its service. These promotional offerings will be subject to approval by the Commission and shall have specific starting and ending dates. (See Current Price List)

SECTION IV - RATES, (Continued)

4.9 Excel Operator Services

The Company's Operator Services is available throughout the State of South Carolina. Callers access the Company's Operator Services by dialing 0+ a 10 digit telephone number, 00 or a Company-provided access code or other Company-authorized access method plus the telephone number of the called station. Upon receipt of the call, the Company may verify the credit-worthiness of the designated billed party. When a payment method cannot be validated, or is unacceptable, callers may be required to select an alternative and acceptable means of payment. Total charges for use of this service include usage charges and an Operator Assistance Service Charge, as set forth below. An Operator Dialed Service Charge also applies to calls in which the caller has the capacity to dial the number, but has the operator dial instead. Usage charges are based upon the duration of a call, and are flat per minute based, 24 hours per day, 7 days per week, during all Time-of-Day Rate Periods. The Time-of-Day Rate Periods are defined as follows:

- **Day Rates** are applicable to calls placed Monday through Friday from 8:00 AM to, but not including, 5:00 PM.
- **Evening Rates** are applicable to calls placed Sunday through Friday from 5:00 PM to, but not including, 11:00 PM; and on Carrier Recognized Holidays, unless a lower rate would normally apply.
- **Night/Weekend Rates** are applicable to calls placed Sunday through Friday from 11:00 PM to, but not including, 8:00 AM the following day, and all day Saturday.

Chargeable time begins when the Company receives signaling to detect that the network connection between the calling station and the called station has been established. Chargeable time ends when either party "hangs up" thereby releasing the network connection. For collect calls, chargeable time begins when the called station accepts responsibility for payment of the charges associated with the call. All calls are measured and billed in one minute increments; fractional minutes of use are rounded up to the next full minute.

A Service Charge is applied to all attempts to verify the condition of a customer line, busy talking, busy not talking (e.g., off hook), except attempts which are unsuccessful due to network equipment failure.
- d. **Busy Line Interruption** - refers to those instances where the Company operator will interrupt an ongoing conversation on a called station. A charge will apply each time the Company operator attempts the emergency interruption whether or not the interruption is successful. A Busy Line Verification must be made and its service charge applied before an Emergency Interruption can be attempted. Once an operator has verified the line, and the called party has agreed to accept the interruption, the Customer is provided the option of completing an operator assisted call to the called station without hanging up or originating a separate call. Customers may accept or refuse the operator's offer to complete the call. Calls completed with the operator's assistance will be charged an additional Service Charge under Station-to-Station or Person-to-Person, as applicable. If the operator dials or completes the call to the verified telephone number for the Customer, the Operator Dialed Surcharge will also apply.
- e. **Operator Dialed Surcharge** - will apply to Station-to-Station and Person-to-Person calls when the Customer has the ability to dial all the digits necessary for call completion but dials instead "0", "00" or another Company-provided access code or other Company-authorized access method to reach a Company operator to have the operator place the call. This surcharge will be incurred by the Customer in addition to the applicable Service Charge. However, the surcharge will not apply to: (1) calls which cannot be completed by the Customer due to equipment failure or trouble on the Company's network; (2) calls placed by parties identified as handicapped and who cannot complete the calls due to the handicap; and (3) calls made on a 0- basis in which a company operator places a call for a calling party after a Busy Line Verification and Busy Line Interruption process has been successfully completed.
